

# Response Codes

## Success Codes

The Addepar API returns HTTP response codes to clarify the status of each API request.

STATUS CODE	TITLE	REQUEST TYPE
200	OK	Successful <b>GET</b> or <b>PATCH</b> request
201	Created	Successful <b>POST</b> request
202	Accepted	Successful <b>POST</b> request to jobs route
204	No Content	Successful <b>DELETE</b> request Successful <b>POST</b> , <b>PATCH</b> , or <b>DELETE</b> to a relationships sub-route
303	See Other	Completed asynchronous job. Follow the link in the "Location" header to retrieve the results.

## Unsuccessful Request Codes

A failed request to the Addepar API will result in one of the following status codes. Please review the "detail" field in the error response for additional information about a particular failed request.

STATUS CODE	TITLE	REASON	TROUBLESHOOTING
400	Bad Request	Improperly formatted query parameters or payload	Check the fields indicated in the error response.
401	Unauthorized	Failed authentication	Check the API key, secret, and "Addepar-Firm" header.
403	Forbidden	User lacks required permission(s)	Check that the user has API permission and Application Permissions or has authorized the required OAuth scope required for the particular URL.
404	Not Found	Incorrect URL or ID	Check that the ID is correct and the user has permission to access it.
405	Method Not Allowed	Unsupported HTTP method	Generally only <b>GET</b> , <b>POST</b> , <b>PATCH</b> , and <b>DELETE</b> are supported.
409	Conflict	Action would result in an invalid data state	Check that the "type" field matches that of the URL.
410	Gone	The resource was available but has expired	Try making another request to the Jobs API
415	Unsupported Media Type	Invalid Content-Type header	Attach "Content-Type" header "application/vnd.api+json".
429	Too Many Requests	Request rate limit has been exceeded	Check the "X-RateLimit-Retry-After" header for the number of seconds until the next request can be made.
500	Internal Server Error	An unexpected error occurred	Please contact Support if you see this.
