

URLs

There are available constructions for the base URL. You can use either construction listed below. Note that all API documentation uses the first construction.

URL	ENVIRONMENT
<code>https://firmdomain.addepar.com/api/</code>	Production
<code>https://api.addepar.com/</code>	Production (Recommended for 3rd party integrations)
<code>https://firmdomain.clientdev.addepar.com/api/</code>	Development Environment (Addepar Academy)

You'll need to replace [firmdomain] to match the URL your firm uses to sign into the Addepar application. For example, if your firm is Terra Bella Capital, your API URL might be `https://terrabella.addepar.com/api/`

What's Next

Rate Limiting

Addepar is a wealth management platform that specializes in data aggregation, analytics and performance reporting.
